

CDFW Recreational Season Lengths and Depth Restrictions for Select California Groundfish (1999-2022)

The following are summarized recreational season and depth limit regulations for select California groundfish from 1999 through 2022, including most inseason changes. Information was compiled from California's sport fishing booklet and supplemental booklets, as well as some emergency rulemakings or press releases.

Nearshore rockfish is defined as: black, black-and-yellow, blue, brown, calico, China, copper, gopher, grass, kelp, olive, quillback, and treefish rockfishes.

Shelf rockfish is defined as: bocaccio, canary, cowcod, widow, yelloweye, yellowtail, shortbelly, bronzespotted, chameleon, chilipepper, dwarf-red, flag, freckled, greenblotched, greenspotted, greenstriped, halfbanded, honeycomb, Mexican, pink, pinkrose, pygmy, redstripe, rosethorn, rosy, silvergrey, speckled, squarespot, starry, stripetail, swordspine, tiger, and vermilion rockfishes.

Table 1. Key to information and visual formatting found in subsequent tables in this document.

Key	Meaning
	Fishing allowed in all waters
20	Depth closed greater than 20fm
30	Depth closed greater than 30fm
40	Depth closed greater than 40fm
50	Depth closed greater than 50fm
60	Depth closed greater than 60fm
30-60	Depth open between 30-60fm
	Fishery Closed
Number	In-season change to depth
	Inseason closure to fishery

CALIFORNIA RECREATIONAL REGULATORY HISTORY, 1999

Prior to the year 2000, the recreational groundfish fishery in California had few restrictions. The fishery was open year-round for the federally managed groundfish such as rockfishes, lingcod, cabezon, greenlings (kelp and rock), California scorpionfish, sanddabs, and for the groundfish associated species like California sheephead and ocean whitefish. There were no depth restrictions for any of these species.

Statewide groundfish and associated species season and depth restrictions prior to the year 2000.

CALIFORNIA RECREATIONAL REGULATORY HISTORY, 2000

Beginning in the year 2000, following the overfished status declaration of the lingcod stock, and some of the rockfishes changes to season lengths began occurring to restrict access to the resource for parts of the year. Additionally, geographic management areas were implemented to allow for more adaptive management of fish stocks.

Beginning in 2000, three management areas were implemented, and included: the Northern Management Area, which covered the area between the California/Oregon border (42° N lat.) to near

Cape Mendocino (40°10' N lat.); the Central Management Area, which covered the area between near Cape Mendocino to Lopez Point (36°00' N lat.); and the Southern Management Area, which covered the area between Lopez Point and the border with Mexico.

Notes for 2001:

- Emergency action was taken by the Commission in order to conform to federal regulations; closures did not apply to shore-based anglers.
- Inseason emergency closure on October 29 prohibited angling for shelf and slope rockfishes and lingcod. Possession of these fishes was prohibited in state waters. In waters less than 20 fathoms, fishing for nearshore rockfishes, California scorpionfish, cabazon, and greenlings continued to be permitted (including waters around offshore rocks and islands less than 20 fathoms). Fishing for California sheephead continued to be permitted in all waters except the Cowcod Conservation Areas.
- On January 1, 2000 the California Fish and Game Commission adopted regulations to be effective through 2002 that closed lingcod, nearshore, and shelf rockfishes as follows: south of Lopez Point to the Mexico border Jan. - Feb.; and north of Lopez Point to Cape Mendocino Mar. - Apr. New regulations that superceded the regulations adopted January 1, 2000 went into effect Mar. 5, 2001. These new regulations included a different regional management boundary between the central and southern management areas – Point Conception instead of Lopez Point. Because of the delay in implementation (March instead of January), the area between Lopez Point and Point Conception was closed from Jan. 1 - Feb. 28, 2001 (as part of the southern area under the 2000 regulations). This area then was open to fishing from March 1- 4, 2001 (as part of the 2000 open fishing period for the southern area). However, once the 2001 regulations took affect on Mar. 5, 2001, this section of coast was closed again from Mar. 5 – Apr. 30 (as part of the central area under the 2001 regulations).

Notes for 2002:

1. Inseason emergency closure took effect for greenlings on July 1, cabazon on July 29, and California sheephead on November 1. Closures do not apply to shore-based anglers, or spearfishing from shore or a man-made structure.
2. The emergency closure for shelf rockfish, lingcod, California scorpionfish, and ocean whitefish went into effect July 1. Nearshore fishing was still allowed in waters shallower than 20 fathoms for nearshore rockfishes, California scorpionfish, and ocean whitefish. There was a special allowance for two shelf rockfish ONLY if taken incidental to nearshore fishing in less than 20 fathoms EXCLUDING bocaccio, canary, cowcod, and yelloweye rockfish, which could not be taken.
3. Management Area boundaries changed January 10, 2002.

Notes for 2006:

1. Inseason change on March 28 decreased the fishing depth limit from 40 to 30 fathoms in the Northern management area, and opened the months of November and December to recreational fishing (except for lingcod which was closed).
2. Inseason change on March 28 kept depth limit at 20 fathoms in the North-Central and Monterey South-Central management areas, but opened December to recreational fishing (except for lingcod which was closed).
3. Inseason change on July 1 liberated the fishing depth limit from 20 fathoms to 30 fathoms in the North-Central and Monterey South-Central management areas (except for lingcod which was closed).
4. Inseason change on July 1 opened October to recreational fishing in the Morro Bay South-Central management area.

5. Inseason change on March 28 allowed recreational fishing in the Southern Management area during October (with 30 fathom depth limit), November (60 fathom depth limit), and December (60 fathom depth limit), except for lingcod which was closed to all fishing.
6. Inseason change on July 1 liberated the fishing depth limit from 30 fathoms to 60 fathoms in the Southern Management area for the remainder of the season (except for lingcod which remained closed in December).

Notes for 2011:

- As part of the biennial management specification process, the North-Central North of Point Arena Management area was renamed the Mendocino Management Area, the North-Central South of Point Arena Management Area was renamed the San Francisco Management Area, and the Monterey South-Central and Morro Bay South-Central Management Areas were combined into the Central Management Area.
- Due to a delay in the federal regulatory process, recreational regulations for 2011 in California did not go into effect until June 11, 2011.

Notes for 2012:

1. Sub-bag limit for greenling increased from two fish to 10 fish within the 10 fish daily RGC bag limit.
2. High encounter rates for cowcod in the SMA lead to inseason action to restrict anglers' maximum fishing depth from 60fm to 50fm.

Notes for 2015:

1. Final federal regulations published on March 9, 2015, with state regulations effective March 10. Changes to regulations included new season dates, a statewide five fish sub-bag limit for black rockfish, reduced boat based season for California scorpionfish in the Southern Management Area, and liberalizing the depth restriction from 50 to 60 fathoms in the Southern Management Area. A statewide increase to a 3 fish daily bag limit for Lingcod.

Notes for 2020: Fishery participation was disrupted by the COVID-19 pandemic, beginning in mid-March. Stay at home orders throughout the state resulted in closures of many ocean access points, and most businesses were closed and/or had severely reduced operations. No changes to regulations were made in response to the pandemic.
